DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12 drawn to a semiconductor device, classified in class 257, subclass 296.
- II. Claims 13-16, drawn to a method of making a semiconductor device, classified in class 438, subclass 238, 239, 386 and 399.

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claim can be made by another materially different process. For example, the dielectric layer or first gate intermediate layer in claims 13 and 15 can be deposited first on a disposable non-semiconductor substrate, then a semiconductor substrate with a surface can be deposited on the dielectric layer. Alternatively, the process as claimed can be used to make other and materially different product, for example, the product claim does not require the step of 'structuring the first electrode.....to produce a first gate electrode' as required by the process claims.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2814

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
